

Hold any guitar with one stand.

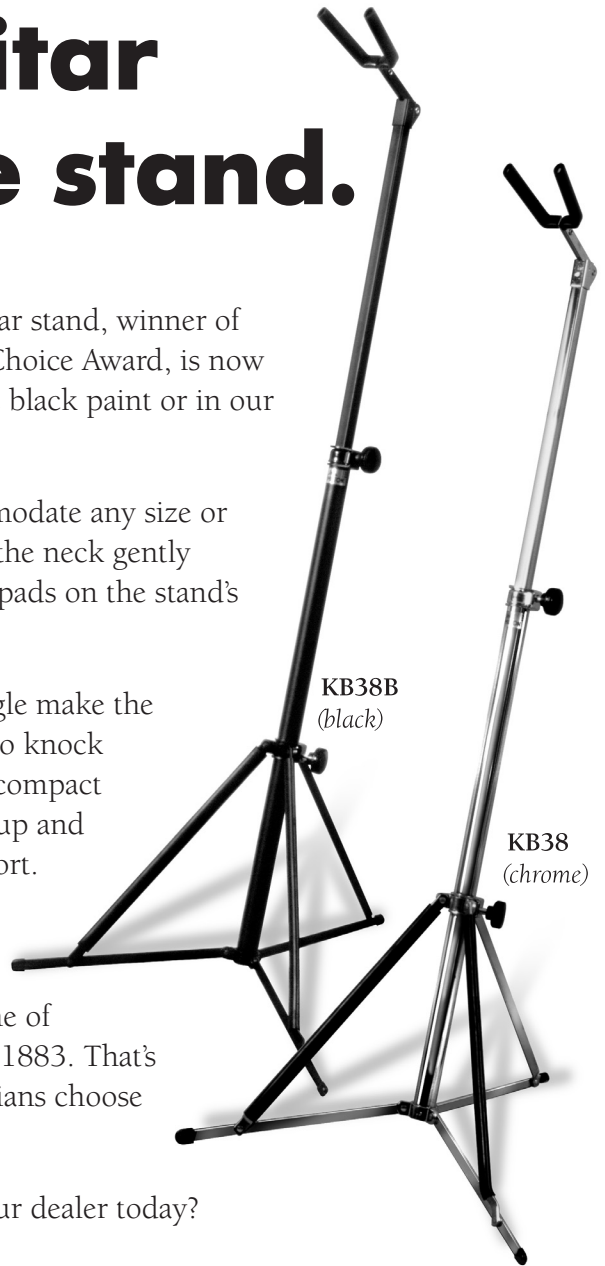

Model **KB38**, our finest guitar stand, winner of the *Acoustic Guitar Players' Choice Award*, is now available in our new, durable black paint or in our traditional nickel chrome.

This versatile design can accommodate any size or shape of guitar. Soft rubber pads at the neck gently hold the guitar's weight. Additional pads on the stand's base protect the guitar body.

The sturdy legs and swept-back angle make the stand nearly impossible to knock over. The one-piece, compact design is easy to set up and convenient to transport.

The **KB38** is built with the same care we've put into every one of our music stands since 1883. That's why so many musicians choose Hamilton.
